

August 16, 2011

Dear Mr. Simmonds,

Thank you for the input of the Ivanhoe Lake Cottager's Association (ILCA). Your input into the development of our project is appreciated and we note the concerns you have raised in this letter and previously through correspondence and our July 6 meeting in Foleyet.

Regarding impacts on Ivanhoe Lake, we would like to reiterate that operation of The Chute GS will not affect the lake and there are no plans to alter operating plans in a manner that would cause any effects. Similarly we do not anticipate any impact on the Town of Foleyet or its water treatment facilities.

The concerns you have raised regarding government energy and environmental policy are outside the scope of our Environmental Assessment, however we would respectfully suggest contacting the Independent Electricity System Operator (IESO), Ontario Power Authority (OPA), Ministry of Energy and Ministry of Environment.

Again, thank you for input provided to our project and if you have further comments or questions related to the project or the Environmental assessment, please feel free to contact me.

Very best regards,

Mark Holmes  
Vice President, Corporate Affairs  
Xeneca
